Summary of Responsibilities:

- Provided HSE guidance and support to management, site teams, and subcontractors to ensure compliance with safety requirements.

- Conducted regular site inspections, safety audits, and prepared safety reports for project management review.
- Monitored compliance with statutory regulations, project safety plans, and approved method statements.
- Identified workplace hazards and assisted in risk assessments and development of safe systems of work.
- Conducted site inductions, toolbox talks, and safety awareness training for workers and supervisors.
- Investigated accidents, incidents, and near misses, ensuring proper reporting and corrective actions.
- Reported unsafe practices and serious safety violations to senior management for immediate action.
- Coordinated safety committee meetings with project teams and subcontractors.
- Inspected lifting equipment, lifting accessories, scaffolding, and other construction activities for compliance.
- Monitored site welfare facilities and ensured compliance with health and safety standards.
- Supported emergency preparedness, fire safety procedures, and first aid arrangements.
- Maintained HSE records, inspection reports, and safety documentation.
- Advise management on Health, Safety, and Environmental (HSE) matters.
- Monitor statutory compliance through regular site inspections and contractor audits.
- Conduct weekly HSE inspections and submit inspection reports to the Project Manager.
- Immediately report any serious safety violations or life-threatening situations to senior management.
- Assist in preparing risk assessments and developing safe systems of work (SSOW).
- Support the development and delivery of HSE training programs.
- Assist supervisors in conducting toolbox talks on risk control measures and safe work practices.
- Conduct HSE induction training for all employees before they commence work.
- Conduct weekly HSE inspections and submit inspection reports to the Project Manager.
- Organize and participate in HSE committee meetings with project staff and subcontractors.
- Assist in accident and incident investigations and prepare investigation reports with corrective and preventive actions.
- Monitor and audit lifting equipment and lifting accessories inspection registers to ensure compliance.
- Inspect site welfare facilities regularly and advise management on improvements and compliance requirements.
- Ensure compliance with client, consultant, and UAE HSE regulations, standards, and project HSE plans.
- Promote a positive safety culture and encourage safe working practices across the project.
