Working at Hight Rescue Drill

Purpose of the Rescue Drill

- To practice **safe and quick rescue** of a fallen worker
- To reduce risk of **suspension trauma**
- To ensure the team knows emergency procedures

What Happened in the Drill

- Simulated fall of a worker using full body harness
- Rescue team activated and responded
- Use of rescue equipment (rope kit / Scaffolding / ladder)

What Went Well

- Quick identification of the emergency
- Good teamwork and communication
- Proper use of rescue equipment
- Area was controlled to prevent further risk

Areas for Improvement

- Delay in starting rescue
- Confusion about roles and responsibilities
- Rescue equipment not immediately available

Key Safety Points

- Never rely only on fall arrest — **always have a rescue plan**
- Rescue must be done within **minutes (not long delays)**
- Always inspect rescue equipment before work
- Keep access clear for emergency response
- Ensure trained rescue team is available at all times

Suspension Trauma Awareness

- Hanging in a harness can be **fatal within a short time**
- Symptoms: dizziness, unconsciousness, breathing difficulty
- Immediate rescue is critical

Lessons Learned

Preparation saves lives

Clear communication is essential

Practice improves response time
