AL TANMIA CHEMICALS LLC

COMPANY STRENGTHS:

1. **Oil & Gas Industry Expertise:** Strong focus on supplying specialty chemicals and providing technical solutions for upstream, midstream and downstream oil & gas operations.
2. **Specialty Chemical Solutions:** Capability to source and supply specialized oilfield chemicals, including drag reducing agents (DRA), production chemicals, process chemicals and other industrial chemical solutions.
3. **Established Manufacturer Relationships:** Business relationships with reputed international chemical manufacturers and technology providers, including CHIMEC, LSPI, Solenis and other specialized suppliers.
4. **Technical Competency:** Experienced technical personnel with knowledge of chemical applications, product selection, troubleshooting and technical support for industrial and oil & gas operations.
5. **Oilfield Chemical Supply Capability:** Ability to source and supply specialized chemicals based on customer specifications, technical requirements and project demands**.**
6. **Industrial Chemical Trading:** Diverse sourcing capabilities for specialty chemicals, industrial chemicals, raw materials and process-related chemical products.
7. **Filtration and Process Solutions:** Capability to supply industrial filtration products, filter elements and associated process equipment for oil & gas and industrial applications**.**
8. **Project Execution Capability:** Experience in chemical system cleaning, high-velocity flushing, chemical dosing system supply, testing and commissioning.
9. **Strong Local Market Understanding:** Good knowledge of Oman's oil & gas sector, industrial requirements, procurement practices and customer expectations.
10. **Supplier and Sourcing Network:** Access to international manufacturers and suppliers, enabling competitive sourcing and reliable supply of specialized products.
11. **Customer-Oriented Approach:** Commitment to understanding customer requirements and providing technically appropriate, commercially competitive solutions.

12. **Quality and Regulatory Commitment:** Focus on product conformity, chemical handling requirements, statutory compliance, customer satisfaction and continual improvement.
13. **Diversified Industrial Capabilities:** Additional expertise in water treatment chemicals, cooling water systems, boiler treatment, reverse osmosis and wastewater treatment applications.
